TL/DR

I was the second hire to the analytics team within my last company, and I've been instrumental in building a world-class data science and analytics unit.

I am seeking to advance my career in analytics by bringing my experience, expertise and passion to an organization wishing to develop a cutting-edge data culture, in a role that maximizes my impact.

Skills & Abilities

'FULL STACK' ANALYTICS, DATA ENGINEERING AND DATA SCIENCE

Skills:

- **Data infrastructure** (design, implement, manage, integrate)
- **Data analysis** (EDA, statistical, visualization, predictive/descriptive)
- **Market economics** (customer segmentation, market segmentation, TAM strategy, PMF strategy)
- **Management** (growth, team, project, budget)
- **Leadership** (strategic, thought, vision, communication)

Systems:

- **Code** (R, Python, SQL)
- **ETL** (dbt, Fivetran, Stitch, Dataiku)
- **CRM** (Salesforce, Hubspot, Qualtrics)
- **Cloud** (SQL Server, Google Cloud, AWS, Azure)

Experience

DATA SCIENCE MANAGER / DATA SCIENTIST / DATA ANALYST | BUILDERTREND | 12/2018 – 05/2023

My first task at Buildertrend was an analysis of our target market and customer base. Since then, I've:

- developed KPIs,
- designed and implemented data collection processes,
- designed and implemented data storage and management infrastructure,
- developed reporting guidelines and practices,
- developed interview and onboarding procedures for new hires,
- implemented a project management process,
- mentored new team members and external stakeholders
- partnered with Santa Clara University to guide students in their Practicum project, 2022 and 2023

Education

B.S., ECONOMICS AND COMPUTER SCIENCE | 2018 | UNIVERSITY OF NEBRASKA AT OMAHA
